

# Registration Permit Update

---

Permit Streamlining Advisory Group

April 18, 2006

Caroline Garber, Bureau of Air Management  
(608) 264-9218, [Caroline.Garber@dnr.state.wi.us](mailto:Caroline.Garber@dnr.state.wi.us)

# Registration Permits

---

- SIP Approval
  - Published in Federal Register (02/06/06)
  - March 8, 2006 Effective Date
- Public Comments on permit templates
  - Short term air quality impacts
  - Modeling

# Draft Changes to ROP

---

- ❑ Easier to follow and understand
- ❑ MACT: if only subject to record-keeping and/or notification requirements
- ❑ LACT: clarifications
- ❑ Some recordkeeping and calculation changes

# Draft Changes to ROP

---

- No changes for applicants
  - That do their own modeling to qualify for ROP,  
OR
  - That have minimal or no PM emissions
  
- Applicants with significant PM emissions
  - Submit certain site, stack and emission information
  - DNR will do air dispersion modeling analysis to determine whether facility's physical design and capacity meet the 24 hour and annual standard for PM<sub>10</sub>
  - DNR will do this within the 15 day “application window”

# Draft Changes to ROP

---

- Permittees with significant PM emissions
  - Limited number of permittees w/ significant PM emissions
  - Must demonstrate that PM10 standards are protected before making changes that increase PM emissions or change PM dispersion characteristics

# What next?

---

- ❑ Another public comment period
- ❑ Pre-test the application process during public comment period and get all systems lined up
- ❑ Issue final permits by early summer
